ROSEMOUNT ANALYTICAL INC.

Analyzer Sensing Line - The In-situ sensors provide measurements for O₂, CO, Transmissometer/Opacity Dust Monitor. Multiprobe averaging systems. Automatic calibration and test gas sequencing systems for flue gas analyzers. High temperature oxygen analyzers. OXYMITTER oxygen transmitter. OCX Oxygen Combustibles.

Combustion Control Systems - Microprocessor based hardware, functional simple software, vast application experiences and low cost make out capability unbeatable. Engineering, installation supervision, consultation, and startup retrofit of boiler control systems.

Power Positioner Line - Hagan pneumatic torque and thrust types. 2-1/2x5 through 8x10 inches. Options include electronic or pneumatic input, limit switches, manual operator and air lock. Torque from 90 to 2700 ft. lbs. Online: www.emersonprocess.com/raihome/gas/

STOCK EQUIPMENT COMPANY

Gravimetric and Volumetric Coal Feeders - Ensure reliable coal flow to the pulverizer, combustor or lime feed systems. High pressure NFPA code installations or low pressure for fluidized bed combustors. Complete bunker to pulverizer systems. Microprocessor upgrade of existing feeder controls. COALLECTOR feeder coal sampling systems for EPA as-fired coal analysis requirements. Genuine STOCK replacement parts and service.

Burner Line Valves - NFPA designed for positive shutoff and pulverizer isolation.

Bulk Material Valves - Designed for harsh environments, wide pressure differentials and unusual material flow characteristics. Products include gate valves, clam shell valves and diverter valves with motorized or manual operators. ACCUFLEX single ply spliced feeder belts. ACCUCHECK chain testing program for feeder accuracy.

Fairfield Engineering Division - Coal yard and limestone handling systems. Bulk material handling .

Services - Custom engineering and design, material flow testing, startup service and commissioning. Unequaled coal flow and handling expertise. Retrofit modernization and reconditioning of existing coal feeders.

DISCOVER DIAGNOSTICS & ANALYSIS

Diagnostic Software and Support Packages. Uses data from your existing Data Acquisition System. Using ADVANCED PATTERN RECOGNITION the system automatically and continuously looks for equipment that is running abnormally. DIAGNOSTIC alerts you to problems in their early stages so maintenance can be scheduled.

TRAXVIEW . Whole plant health monitor. Continuous sensor validation. On site setup and support.

Feedwater Heater Leak Detection.

AIR LIQUIDE AMERICA CORPORATION

Test Gas Cylinders - Certified gas mixtures for instrument calibration. Fixed flow regulators. Disposable 6D (103 liters) cylinders. MSDS documented. Portable test gas kits.

“SALES - SERVICE - APPLICATION” ASSISTANCE
